---	--

FACTORS AFFECTING MINIMUM RANGE	25
Pulse Length	25
Sea Return	25
Side-Lobe Echoes	25
Vertical Beam Width	25
FACTORS AFFECTING RANGE ACCURACY	25
Fixed Error	25
Line Voltage	25
Frequency Drift	25
Calibration	25
Pip and VRM Alignment	26
Range Scale	26
PPI Curvature	26
Radarscope Interpretation	26
FACTORS AFFECTING RANGE RESOLUTION	26
Pulse Length	26
Receiver Gain	28
CRT Spot Size	28
Range Scale	28
FACTORS AFFECTING BEARING ACCURACY	29
Horizontal Beam Width	29
Target Size	29
Target Rate of Movement	29
Stabilization of Display	29
Sweep Centering Error	29
Parallax Error	29
Heading Flash Alignment	29
FACTORS AFFECTING BEARING RESOLUTION	29
Horizontal Beam Width	29
Range of Targets	30
CRT Spot Size	31

WAVELENGTH	31
TARGET CHARACTERISTICS	34
Height	34
Size	34
Aspect	34
Shape	34
Texture	34
Composition	34

CHAPTER 2—RADAR OPERATION

RELATIVE AND TRUE MOTION DISPLAYS	35
GENERAL	35
RELATIVE MOTION RADAR	35
Orientations of Relative Motion Display	36
Stabilization	36
TRUE MOTION RADAR	37
Stabilization	37
Radarscope Persistence and Echo Trails	37
Reset Requirements and Methods	37
Modes of Operation	38
Types of True Motion Display	38
PLOTTING AND MEASUREMENTS ON PPI	39
THE REFLECTION PLOTTER	39
Basic Reflection Plotter Designs	39
Marking the Reflection Plotter	39
Cleanliness	39
PLOTTING ON STABILIZED AND UNSTABILIZED DISPLAYS	39
Stabilized North-Upward Display	39

RANGE AND BEARING MEASUREMENT	44
Mechanical Bearing Cursor	44
Variable Range Marker (Range Strobe)	44
Electronic Bearing Cursor	44
Interscan	45
Off-Center Display	45
Expanded Center Display	46
RADAR OPERATING CONTROLS	47
POWER CONTROLS	47
Indicator Power Switch	47
Antenna (Scanner) Power Switch	47
Special Switches	47
PERFORMANCE CONTROLS—INITIAL ADJUSTMENTS	48
Brilliance Control	48
Receiver Gain Control	49
Tuning Control	50
PERFORMANCE CONTROLS - ADJUSTMENTS ACCORDING TO OPERATING CONDITIONS	50
Receiver Gain Control	50
Fast Time Constant (FTC) Switch (Differentiator)	50
Rain Clutter Control	50
Sensitivity Time Control (STC)	52
Performance Monitor	53
Pulse Lengths and Pulse Repetition Rate Controls	54
LIGHTING AND BRIGHTNESS CONTROLS	54
Reflection Plotter	54
Heading Flash	54
Electronic Bearing Cursor	54
Fixed Range Markers	54
Variable Range Marker	54
Panel Lighting	54

MEASUREMENT AND ALIGNMENT CONTROLS	54
Range	54
Bearing	55
Sweep Centering	55
Center Expansion	55
Heading Flash Alignment	55
Range Calibration	55
TRUE MOTION CONTROLS	56
Operating Mode	56
Normal Reset Control	56
Delayed Reset Control	56
Manual Reset Control	56
Manual Override Control	56
Ship's Speed Input Selector Control	56
Set and Drift Controls	56
Speed and Course Made Good Controls	57
Zero Speed Control	57

CHAPTER 3—COLLISION AVOIDANCE

RELATIVE MOTION	59
THE VECTOR TRIANGLE	63
VECTOR EQUATIONS	64
MANEUVERING BOARD	66
MANEUVERING BOARD FORMAT	66
PLOTTING ON MANEUVERING BOARD	66
Relative Movement Problems	71
THE LOGARITHMIC TIME-SPEED-DISTANCE NOMOGRAM	74
NAUTICAL SLIDE RULES	76

GRAPHICAL RELATIVE MOTION SOLUTIONS	76	EXAMPLE 5—COURSE TO PASS SHIP AT A SPECIFIED CPA (Own ship's speed is less than that of other ship)	98
RAPID RADAR PLOTTING	77	EXAMPLE 6—VERIFICATION OF FIXED OBJECTS OR RADAR CONTACTS DEAD IN THE WATER	100
TRANSFER PLOTTING	77	EXAMPLE 7—AVOIDANCE OF MULTIPLE CONTACTS WITHOUT FIRST DETERMINING THE TRUE COURSES AND SPEEDS OF THE CONTACTS	102
SELECTION OF PLOTTING TECHNIQUES	77	EXAMPLE 8—DETERMINING THE CLOSEST POINT OF APPROACH FROM THE GEOGRAPHICAL PLOT	104
RADAR PLOTTING SYMBOLS	81	ALTERNATIVE RADAR PLOTTING SYMBOLS	106
GRAPHICAL SOLUTIONS ON THE REFLECTION		STANDARD PLOTTING PERIOD	108
PLOTTER RAPID RADAR PLOTTING	83	SUMMARY OF ALTERNATIVE PLOTTING SYMBOLS	
CLOSEST POINT OF APPROACH	83	R-T-M TRIANGLE	110
TRUE COURSE AND SPEED OF CONTACT	83	ALTERNATIVE GRAPHICAL SOLUTIONS ON THE	
COURSE TO PASS AT SPECIFIED CPA	85	REFLECTION PLOTTER	112
SPECIAL CASES	86	CLOSEST POINT OF APPROACH	112
CONSTRUCTING THE PLASTIC RULE USED WITH		TRUE COURSE AND SPEED OF CONTACT	112
RAPID RADAR PLOTTING	88	COURSE TO PASS AT SPECIFIED CPA	114
		SPECIAL CASES	115
		BLACK LIGHT ILLUMINATION	115
		EXAMPLES	
		e-r-m TRIANGLE	
EXAMPLE 1—DETERMINATION OF CLOSEST POINT OF APPROACH (CPA)	90	R-T-M TRIANGLE	
EXAMPLE 2—COURSE AND SPEED OF A RADAR CONTACT	92	EXAMPLE 9—DETERMINATION OF CLOSEST POINT OF APPROACH (CPA)	118
EXAMPLE 3—COURSE AND SPEED OF RADAR CONTACT BY THE LADDER METHOD	94		
EXAMPLE 4—COURSE TO PASS A SHIP AT A SPECIFIED CPA (Own ship's speed is greater than that of other ship)	96		

EXAMPLE 10—COURSE AND SPEED OF A RADAR CONTACT	120
EXAMPLE 11—COURSE AND SPEED OF RADAR CONTACT BY THE LADDER METHOD	122
EXAMPLE 12—COURSE TO PASS A SHIP AT A SPECIFIED CPA (Own ship's speed is greater than that of other ship)	124
EXAMPLE 13—COURSE TO PASS SHIP AT A SPECIFIED CPA (Own ship's speed is less than that of other ship)	126
EXAMPLE 14—VERIFICATION OF FIXED OBJECTS OR RADAR CONTACTS DEAD IN THE WATER	128
EXAMPLE 15—AVOIDANCE OF MULTIPLE CONTACTS WITHOUT FIRST DETERMINING THE TRUE COURSES AND SPEEDS OF THE CONTACTS	130
PRACTICAL SOLUTION FOR CPA IN TRUE MOTION MODE	132
SITUATION RECOGNITION	139
INTRODUCTION	139
RULES FOR SPEED CHANGE	140
Reduced Speed	140
Increased Speed	140
Speed of Relative Motion (SRM)	140
SITUATION DISPLAYS	140
APPLICATION	140
RULES FOR MANEUVERING	145

CHAPTER 4—RADAR NAVIGATION

RADARSCOPE INTERPRETATION	147
LAND TARGETS	147
SHIP TARGETS	149
RADAR SHADOW	149
BEAM WIDTH AND PULSE LENGTH DISTORTION	149
SUMMARY OF DISTORTIONS	151
RECOGNITION OF UNWANTED ECHOES AND EFFECTS	152
Indirect (False) Echoes	152
Side-lobe Effects	153
Multiple Echoes	153
Second-Trace (Multiple-Trace) Echoes	153
Electronic Interference Effects	155
Blind and Shadow Sectors	155
Spoking	156
Sectoring	156
Serrated Range Rings	156
PPI Display Distortion	156
Hour-Glass Effect	156
Overhead Cable Effect	156
AIDS TO RADAR NAVIGATION	158
RADAR REFLECTORS	158
RADAR BEACONS	158
Racon	159
Ramark	160
RADAR FIXING METHODS	161
RANGE AND BEARING TO A SINGLE OBJECT	161
TWO OR MORE BEARINGS	161

TANGENT BEARINGS	161
TWO OR MORE RANGES	161
MIXED METHODS	162
PRECONSTRUCTION OF RANGE ARCS	163
CONTOUR METHOD	164
IDENTIFYING A RADAR-INCONSPICUOUS OBJECT	165
FINDING COURSE AND SPEED MADE GOOD BY PARALLEL-LINE CURSOR	166
USE OF PARALLEL-LINE CURSOR FOR ANCHORING	167
PARALLEL INDEXING	169
THE FRANKLIN CONTINUOUS RADAR PLOT TECHNIQUE	182
TRUE MOTION RADAR RESET IN RESTRICTED WATERS	184
RADAR DETECTION OF ICE	186
ICEBERGS	186
BERGY BITS	186
GROWLERS	186
RADAR SETTINGS FOR RADARSCOPE PHOTOGRAPHY	187
NAVIGATIONAL PLANNING	188
SPECIAL TECHNIQUES	189
Identifying Echoes	189
Fixing	189

CHAPTER 5—AUTOMATIC RADAR PLOTTING AIDS (ARPA)

INTRODUCTION	191
STAND-ALONE AND INTEGRAL ARPA'S	191
ARPA DISPLAY	192
Raster-scan PPI	192
Monochrome and Color CRT	192
FEATURES AND OPERATING INSTRUCTIONS FOR A MODERN RASTER SCAN RADAR AND ARPA	193
INTRODUCTION	193
FEATURES	193
General Features	194
ARPA Features	194
DISPLAY CONTROLS	196
Mode Panel	196
Plotting Keypad	197
OPERATION	198
TURNING ON POWER	198
TRANSMITTER ON	198
CRT BRILLIANCE	198
TUNING THE RECEIVER	199
Auto Tune	199
Manual Tune	199
Video Lockup Recovery	199
DEGAUSSING THE CRT SCREEN	202
INITIALIZING THE GYRO READOUT	202
PRESENTATION MODES	202
Relative Motion (RM)	202

True Motion (TM)	202	True or Relative Vector	213
SELECTING THE PRESENTATION MODE.....	202	Vector Time	213
Head-up Mode	203	Target Data	213
Course-up Mode	203	Reading the Target Data	213
Head-up TB (True Bearing) Mode	204	Terminating Target Plotting	213
North-up Mode	204	Entering Own Ship's Speed.....	213
True Motion Mode.....	205	Automatic Speed Input	214
SELECTING THE RANGE SCALE.....	206	Manual Speed Input	214
SELECTING THE PULSEWIDTH.....	206	TARGET TRAILS (ECHO TRAILS)	215
Selecting Pulsewidth 1 or 2	206	True or Relative Trails.....	215
Presetting Pulsewidths 1 and 2	206	Trail Gradations	215
ADJUSTING THE SENSITIVITY	206	Displaying and Erasing Echo Trails	215
SUPPRESSING SEA CLUTTER.....	207	Resetting Echo Trails.....	215
Automatic Anti-clutter Control.....	207	PARALLEL INDEX LINES	216
Manual Anti-clutter Control	207	Displaying and Erasing the Index Lines	216
SUPPRESSING PRECIPITATION CLUTTER.....	207	Adjusting Index Line Intervals	216
INTERFERENCE REJECTOR	207	ANCHOR WATCH	216
MEASURING THE RANGE	208	Activating Anchor Watch	216
MEASURING THE BEARING	208	Alarm Range Setting.....	216
COLLISION ASSESSMENT BY OFFSET EBL.....	209	Showing Drag Lines	217
MEASURING RANGE AND BEARING BETWEEN		Anchor Watch in Standby or Transmit Status	217
TWO TARGETS.....	210	Origin Mark	217
SETTING A GUARD ZONE (GUARD ALARM).....	210	Zoom.....	217
SILENCING AUDIBLE ALARM, REACTIVATING		MARKERS	218
GUARD ALARM.....	210	Heading Marker	218
DISABLING GUARD ZONE (GUARD ALARM).....	211	Temporarily Erasing Heading Marker	218
INWARD AND OUTWARD GUARD ALARMS	211	North Marker	218
OFF-CENTERING	211	Stern Marker	218
ECHO STRETCH.....	211	Menu Keys.....	218
ECHO AVERAGING.....	211	FUNCTION KEYS	219
ELECTRONIC PLOTTING (E-PLOT).....	212	Watch Alarm.....	220
Plotting a target.....	212	EPA Menu	220

NAVIGATION INFORMATION	221	MODE AND LENGTH OF VECTORS	231
Menu and Navigation Data Display	221	True or Relative Vectors	231
Suppressing Second-trace Echoes	221	True Vector	231
Adjusting Relative Brilliance Levels of Screen Data	222	Relative Vector	231
Set and Drift (Set and Rate)	222	Vector Time	231
OPERATION OF ARPA	223	PAST POSITIONS	231
GENERAL	223	Displaying and Erasing Past Positions	231
PRINCIPAL SPECIFICATIONS	223	Selecting the Number of Dots and Past Positions	
Acquisition and Tracking	223	Intervals	232
Vectors	223	SETTING CPA/TCPA ALARM RANGES	232
ARPA MENU OPERATION	224	Silencing CPA/TCPA Aural Alarms	232
START UP PROCEDURE	224	Setting a Guard Zone	232
Activating the ARPA	224	Activating the Guard Zone	233
Entering Own Ship's Speed	224	Deactivating the Guard Zone	233
Automatic Speed Input	224	Silencing the Guard Zone Audible Alarm	233
Manual Speed Input	225	Operational Warnings	233
Target Based Speed	225	CPA/TCPA Alarm	234
Cancelling Target Based Speed	225	Guard Zone Alarm	234
Deactivating the ARPA	225	Lost Target Alarm	234
AUTOMATIC ACQUISITION	225	Target Full Alarm	234
Enabling and Disabling Auto Acquisition	226	Manually Acquired Targets	234
Setting Auto Acquisition Areas	226	Automatically Acquired Targets	234
Terminating Tracking of Targets	227	System Failure Alarm	234
Individual Targets	227	TRIAL MANEUVER	235
All Targets	227	Dynamic Trial Maneuver	235
Discrimination Between Landmass and True Targets	227	Static Trial Maneuver	235
MANUAL ACQUISITION	227	Terminating Trial Maneuver	235
CHANGING PLOT SYMBOL SIZE	227	CRITERIA FOR SELECTING TARGETS FOR	
ADJUSTING BRILLIANCE OF PLOT MARKS	227	TRACKING	236
DISPLAYING TARGET DATA	230	Acquisition and Tracking	236
		Quantization	236

RADAR OBSERVATION	237
GENERAL	237
Minimum Range	237
Maximum Range	237
X-Band and S-Band	237
Radar Resolution	237
Bearing Resolution	237
Range Resolution	237
Bearing Accuracy	237
Range Measurement	237
FALSE ECHOES	238
Multiple Echoes	238
Sidelobe Echoes	238
Virtual Image	238
Shadow Sectors	238
SEARCH AND RESCUE TRANSPONDER (SART)	238
 POST-IT NOTE METHOD OF RADAR CONTACT THREAT AND ASPECT ASSESSMENT	239

CHAPTER 6—MANEUVERING BOARD MANUAL

PART ONE: OWN SHIP AT CENTER	309
